

amAZing
adventures

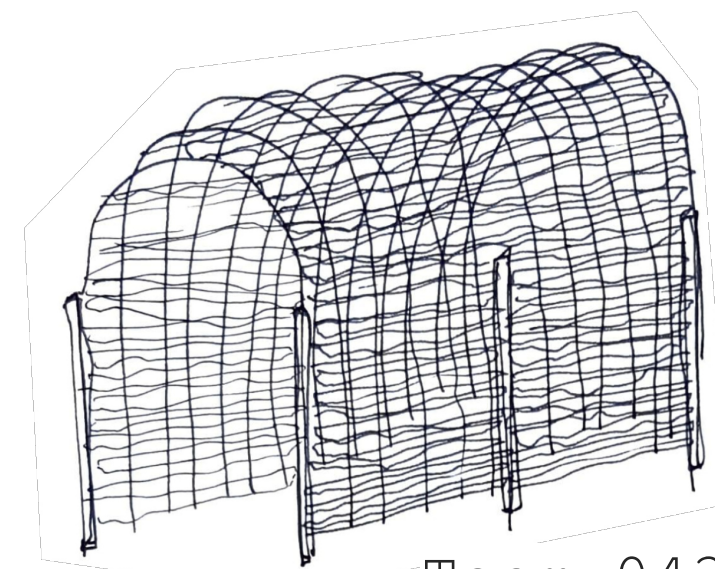

Get lost so you can discover
yourself and others.

As you walk, run and play while finding new paths, you become a part of your environment and come across hidden treasures and new spaces. The maze which is rearrangeable because of its modular components, facilitates the children to undergo all kinds of different adventures.

Clearings with different shapes and sizes contain outdoor musical instruments and crops to learn about nature. The pupils in-between the snake-like corridors are guided by the music produced by others so they can locate the places of gathering, learning and connecting. The soccer field with its long roof construction portrays the heart of the structure as an open space for the entire community.

The corridors consist of open walls and closed like tunnel structures which are made of concrete foundations bearing poles out of local wood that are connected through wooden mesh web.
